Select user to pair

UC-350BLE

All users

P1---------
P2---------
P3---------
P4---------
P5---------
P6---------
P7---------
P8---------

Select User ID among P1 to P7.

NOTE: Remember your "P#" to ensure data is stored under correct user.

Symbol [ ] will appear on the LCD, if paring is successful.

See the manual for more details.

4. Start measuring

Be sure to select your "P#" on the scale. Guest User should select "P8".

- On the scale, press and hold "SET" button for about 3s to enter setting mode. Once "P1" flashes, press the function button ▲ or ▼ to select your "P#" among P1 to P8. Press "SET" button to lock it.

- Step on the platform when the scale displays "0.0". Stand still until the unit (lb/kg) stop flashing.

- A beep sound will indicate to step off and the scale will display your weight value

- Data transmission will process automatically if paired successfully.

Refer to Data Transmission in the manual for more details.

5. Multiuser

- Up to 8 people can use and store reading on the scale.

- **Be sure to select your "P#" on the scale. Guest User should select "P8".**

- Follow the steps above to start measuring

6. Offline measurement

Even when you don't have your phone, the weight data is stored in your ID memory and transmitted next time the scale is connected with your phone (max 30 memory).

Be sure to select your "P#" on the scale. Guest User should select "P8".

- Position the scale on a flat, hard surface.

- Step onto the scale platform and remain still until the unit (lb/kg) stop flashing.

- A beep sound will indicate to step off and the scale will display your weight value

- The scale will automatically turn off after a few seconds.
